Work Experience

WordPress Designer   Techkor   Aug 2022 - Sept 2023

My primary responsibilities involved developing, designing and maintaining assigned projects along with resolving any related design and implementation issues. Developing and designing responsive static websites for business and gathered requirements and presented them to stakeholders. Made product knowledge readily available to self and other stakeholders using various courses. Worked closely with quality engineers, designers, and the support team.

UI/UX Designer   Techkor   October 2023 - Current

As a UI/UX designer at Techkor, I collaborate closely with cross-functional teams to understand project requirements and user needs. My responsibilities include conducting thorough user research, creating wireframes and prototypes, and developing visually appealing interfaces that enhance user experience while aligning with brand guidelines. I continuously iterate on designs based on feedback and industry best practices, staying updated on emerging trends and technologies.
