Flutter Internship

AntonX Pvt Ltd

09/2022 - 01/2023, Peshawar

Utilize Provider for efficient state management and Firebase Database for data storage. This combination will enable a user-friendly and reliable diary experience with synchronized entries across devices.

Associate Flutter Developer

Eziline Software House

03/2023 – 02/2024, Rawalpindi

As a Junior Flutter Developer, I am passionate about creating engaging and user-friendly mobile applications using the Flutter framework. With a strong foundation in Dart programming and a keen eye for UI/UX design, I am dedicated to crafting visually appealing and highly functional apps that meet the needs of both clients and end-users.

Flutter Team Lead

Veevo tech

01/2024 – current, Peshawar

As a seasoned Flutter Developer, I have honed my skills in leading teams to deliver exceptional mobile applications. With a deep understanding of Dart programming and a passion for crafting engaging user experiences, I am confident in my ability to guide and inspire my team to create innovative and high-quality Flutter apps.

Project in Play Store

1. [My Local Mesh Vendor](#)

Its services provider app and the app provide a platform that allow skilled and experienced professionals to connect with user looking for specific services

[My Role](#)

Maintenance of the App and some Extra feature integrated

[Link:-](#) [MLM Vendor](#)

2. [My Local Mesh Customer](#)

Its services Customer app and the app provide a platform that allow user to connect with My Local Mesh Vendor who are skilled and experienced professionals

[My Role](#)

Maintenance of the App and some Extra feature integrated

[Link:-](#) [MLM Customer](#)

3. [Spext](#)

As an adept user of Spext, the premier SMS and calling campaign app, I harness its functionalities to optimize communication strategies. Proficient in executing targeted SMS campaigns, managing call campaigns, and analyzing campaign performance, I contribute to enhancing customer engagement and driving business growth. Spext exemplifies my commitment to utilizing advanced technology for superior marketing practices, demonstrating my dedication to fostering effective communication and achieving strategic objectives.

[Link:-](#) [Spext](#)

4. [Empleado](#)

As a proficient user of Empleado, the leading HR management app, I leverage its capabilities to enhance workforce administration. Proficient in tasks such as seamless onboarding, streamlined leave request management, and efficient performance review facilitation, I contribute to maintaining compliance with HR regulations and fostering organizational efficiency. Empleado stands as a testament to my commitment to leveraging technology for optimal HR practices, showcasing my dedication to cultivating a dynamic and thriving workplace culture

[Link:-](#) [Empleado](#)

5. [BNM Hospital](#)

BNM Hospital App is a cutting-edge hospital management application that empowers patients to take control of their healthcare. With this user-friendly app, patients can seamlessly access their medical records, including prescriptions, invoices, and lab reports. Additionally, the app provides a convenient platform for scheduling appointments and receiving push notifications regarding important healthcare updates.

[Link:-](#) [BNM](#)

6. [EziGhar](#)

Ezighar App is a revolutionary real estate management solution that empowers users to navigate the complexities of property ownership with ease. This user- friendly app provides a centralized platform for managing bookings, invoices, installment plans, and apartment searches.

[Link:-](#) [Ezighar](#)

7. [Feedback App](#)

Feedback App is a sophisticated SMS processing and feedback management system designed to gather and analyze user feedback from SIM SMS messages. The app's core functionality revolves around keyword detection and dynamic API integration, ensuring that relevant feedback is seamlessly transmitted to the appropriate destinations. Feedback App prioritizes reliable feedback transmission by monitoring internet connectivity and storing feedback in a queue when offline.

8. [Musamimuk](#)

Currently work

Musamimuk is a custom-built photo editing app designed from scratch to offer a comprehensive set of tools for enhancing images. Featuring advanced filters, color adjustments, cropping, and retouching, the app delivers a seamless and intuitive editing experience for professional-quality results.

My Role: As the creator of Musamimuk, I developed the app from scratch, managing its design, functionality, and ongoing maintenance. I also integrate new features to continually enhance user experience and ensure optimal performance.

Projects

1. [Food App With Voice Assistance \(FYP\)](#)

This app allows users to find, order, and customize their meals using voice commands. This app uses Advanced speech recognition technology (ALAN) that understands and responds to natural language Commands. This app typically has a user-friendly interface that displays a range of food options. Users can browse through the menu, view images and read descriptions of each dish. Once the user has made their Selection, they can place an order by speaking into their device.

2. [Car Parking App \(Freelancing\)](#)

The app facilitates advance parking space booking with Easy Paisa payment, offers directions to parking spots, and shows real-time parking availability.

3. [ChatGpt App](#)

This application uses a pre-trained machine learning model called GPT (Generative Pre-trained Transformer) to generate responses to user messages in a conversational style. The app allows users to customize the chat experience by selecting different models to generate responses, such as the standard GPT model or a model fine-tuned on a specific topic or language. Users can also adjust the length and complexity of the responses generated by the app.

4. [Covide 19 Tracker App](#)

This Covide19 app retrieves real-time COVID-19 data from a third-party service using an API. The app Uses this data to display up-to-date information about the COVID-19 pandemic, such as the number of cases, deaths, and recoveries in a particular region or country.

5. [Compas App](#)

A compass app is a mobile application that simulates the functionality of a traditional magnetic compass. The app uses the sensors and GPS (Global Positioning System) technology in the user's device to Determine the user's location and orientation, and display the direction of the user's heading.
