SUMMARY

WORK EXPERIENCE

SHANGHAI SHENKAI PETROLEUM

3 Months

Geologist

- Conducted real-time monitoring and analysis of drilling parameters, geological data, and gas levels during drilling operations.
- Collected, labeled, and preserved drilling cuttings and core samples, ensuring accurate documentation for geological analysis.
- Generated comprehensive well logs and reports, including lithology, hydrocarbon shows, and drilling data, providing critical insights for decision-making.
- Maintained and calibrated mud logging equipment, sensors, and analytical instruments to ensure accurate data acquisition.
- Adhered to strict safety protocols and procedures to mitigate potential hazards associated with drilling activities.
- Collaborated closely with drilling crews and geologists to relay critical information and findings, facilitating effective decision-making.
- Quickly identified and resolved equipment malfunctions and data anomalies to minimize downtime and maintain data integrity.
- Compiled and organized detailed records of drilling operations, geological findings, and equipment maintenance activities for reporting and analysis purposes.

BELMONT ASIA NDT & QUALITY SERVICES

15 Months

Junior Geologist

- Assist in the preparation and setup of inspection equipment, tools, and materials required for inspections, ensuring everything is in working order and ready for use.
- Assist in the documentation of inspection activities, including recording measurements, observations, and test results accurately and legibly.
- Collect samples, specimens, or data as directed by the lead inspector, following established protocols and safety procedures.
- Help maintain and clean inspection equipment, ensuring it is in good condition and calibrated regularly to ensure accurate measurements.
- Support the lead inspector in conducting inspections by providing assistance as needed, such as holding instruments, taking notes, or operating equipment under their guidance.
- Strictly adhere to safety protocols and guidelines to ensure a safe working environment.

SUI NORTHERN GAS PAKISTAN

18 Months

Sub Engineer

- Played a pivotal role in overseeing and managing the implementation of gas infrastructure projects, ensuring adherence to engineering standards and safety protocols.
- Collaborated with senior engineers to contribute to the design and planning of gas distribution and transmission systems, including pipelines and associated facilities.
- Developed and reviewed technical drawings, blueprints, and schematics to guide construction and maintenance activities.
- Conducted quality inspections and tests on equipment, materials, and construction processes to verify compliance with industry standards and project specifications.
- Strictly enforced safety measures, protocols, and regulatory guidelines, ensuring the well-being of team members and the public during project execution.
- Maintained accurate project records, documentation, and progress reports, facilitating efficient project management and reporting.
- Worked closely with cross-functional teams, including contractors, technicians, and inspectors, to coordinate project activities and resolve technical issues.

EDUCATION

University of AJK
Muzaffarabad,

BS Applied Geology
2020

COMPUTER
PRO-EFFICIENCY

SKILLS

LANGUAGES

- MS Office
- Windows OS
- Documentation Review
- E-mailing

- Geological Mapping
- Sample Collecting
- Emergency Responses
- Data Analysis
- Technical Reporting

- English
- Urdu
- Punjabi
