Academic Projects

My final year project in "Driver Sleep Detection and Alarming System". Road accidents became a matter pf Concern due to huge increase in Traffic .The primary cause of accidents is due to Drowsiness of Drivers in the Nighttime. Drowsiness are some of leading cause of major accidents on Highway .The only solution to this problem is detecting the Drowsiness and sleepy driver.

Benefits

- Affordable cost of the application.
- This can help avoid a lot of accidents.
- Drowsiness accidents became decrease due to this application.
- Sleepiness detection is efficient and alarm will be generated only when demanded.
