RECENT PROJECTS

AI Password Generator (passgeni) (08/2023 - 10/2023)

- I was the Project Manager and was responsible for the project documentation and deliverable.
- Design the frontend using React js and SASS and Bootstrap for the responsiveness
- It generates a password in the form of a minimum of two words and a maximum of four words related to your profession.

Softgalaxies (08/2022 - 08/2022)

- This website is for a software company in Germany which provides services in Germany.
- It was an awesome project for me to work with the team and understand git and GitHub more deeply.
- Created this website using HTML, CSS, Js, and bootstrap.

Jaishu Gems (09/2022 - 10/2022)

- This was my first real-time project with the company, it's kind of E-commerce website selling Gems in Pakistan.
- Designed this website Using HTML, SASS, Js, and Bootstrap, and on the Backend used PHP and MySQL.
- Learned how to use git and Github with the Team and Resolve conflicts of Github.
