Worked in java programming language as a frontend developer for making an android based mobile application.

SOFTWARE SKILLS

React native -
Word Press -
Java -

FINAL YEAR PROJECT

My final year project was Women Safety Application. It is an android based mobile application, developed in Java language. The key points of this application are following:

This application is used for security purposes of women.
SOS shortcut sends to guardian and police.
Sending location of the user to the nearest police station.
Capturing images sending them through the police.
To get the current location of phone and then share with authorities.
