EXPERIENCE

UI/UX Design

• I have experience in UI/UX designing, in Figma and Adobe XD.

Android Powered Mobile App for Formative Assessment of Students   August 2021

• This app provides formative assessment tools to the teachers. This will give the students an opportunity to see where they stand and help identify the areas in which they need improvement. This will work in conjunction with the traditional assessment and as a result improve the quality of learning.

Patient Management System Using Linked list   Sept 2020

• It is a Simple C++ project for patient Information system. It gives a simple example of a complete system with the functionality of add record, search record, update record and delete record using linked list. If user understand basic CRUD (Create, Read, Update and Delete) functionality it would be easy for them. Patient management systems is powerful, flexible, and easy to use and is designed and developed to deliver real conceivable benefits to hospitals.

Voice Controlled Home Appliances   April 2019

• We just need an Arduino UNO to serially communicate with HC-05 Bluetooth module and a smartphone to send voice command to Bluetooth module HC-05, for receiving voice command we are using "Arduino Bluetooth Voice Controller" android app.
