## OBJECTIVE

A responsible computer professional who is always willing to learn more and help colleagues out. Giving my best in stressful and demanding situations. Well-presented, who is able to combine a polite manner with efficiency. Looking for a job opportunity with a reputable company that will allow me to develop my skills & potential.

## PROJECTS

**An Android App for Detecting Defects in Steel**

Developed an android application which would find defects in steel images by providing image of steel to the app.

**Controlling PowerPoint Slides using Hand Gestures**

Developed a project which would use image processing for detection and executing a specific command corresponding to that hand gesture. Also improved my HCI skills while working on this project.

**Security Project using Image Processing**

Developed a project to identify changes in a specific room for security purpose using image processing techniques using MATLAB.

**Database Development for School**

Designed and made Database for the Ran'aa School for underprivileged and street children in MS Access and Oracle.

## TRAINING

**LaTeX Training**

Attended training on LaTeX to bachelor's students.

**Firestore Real Time Database**

Attended training on introduction to firestore.

**Web Development**

Attended training on basics of web engineering.

**Cyber-Crime VS Cyber-Security**

Attended workshop on cyber-crime vs cyber-security.
