6. Reviving of soapstone mining project.

30/08/2019 – 09/06/2023 Haripur

Educational researcher The university of Haripur

I had the opportunity to participate in a geological research fieldworks in the Margala Hills, Salt Range, Muzafarabad Kashmir, Kohistan Island Arc and Karakorum Block in Gilgit. This region is particularly fascinating as it lies at the intersection of the Indian and Eurasian tectonic plates. Overall, these fieldworks was a unique and enriching experience, allowing me to gain a deeper understanding of the geological processes that have shaped this region. The collision of the Indian and Eurasian plates has created a complex geological landscape, with a rich and diverse Geology.
